

Introducing Your Property Mentor

Jason Steven

I first heard out about The Property Club through a friend back in 2010.

At that time, I had been researching on the Internet of investment properties in Australia, only to find a variety of conflicting opinions.

I felt totally confused and unsure as to the right location and property type.

That was until I attended my first Property Club education evening via a Webinar.

It all just fell into place from that night on, where I soon realised the benefits of purchasing through a club that was designed by property investors for property investors.

The Property Club provided my family and I with a way of purchasing property that provide a good rental return with capital growth.

With a line of credit in place and loans arranged by Club Loans, we have been able to purchase three properties with the Club. These properties are located in Brisbane, Gold Coast and Perth. Our total property portfolio is now valued at over \$1.2 million

It has only been with the help and support of the Property Club, that I have been able to learn and pass on the knowledge of how to buy at little cost to us and how to hold for long-term wealth creation and retirement funding.

We have used the Kevin Young Wealth Plan to help us on the way to achieve financial independence and retirement from my paid employment.

As a Property Mentor I can now pass on the knowledge of buying, managing and holding multiple properties for retirement, through the benefits I have gained from the Property Club.

I do not provide advice as a financial advisor or an accountant. However I can help you do what I have done; create wealth from buying property with the Club. Then with the support systems and ongoing assistance, to retirement on your properties.

My role as your Property Mentor is to let you know how the Club can assist you through the property selection and purchasing process and assistance to hold long term.

I am here to help you to create wealth through property.

Please feel free to contact me at any time.

Regards

Jason Steven
